

Dr. Judith Cohen, Lab Manager

judith@volcani.agri.gov.il

I completed my B.Sc. in Medical Sciences at Hadassah Medical School, Hebrew University of Jerusalem, followed by my M.Sc. and Ph.D. at the Weizmann Institute of Science, where I focused on breast cancer-related cell signaling. My postdoctoral research centered on cell biology with an emphasis on RNA trafficking. Now, I enjoy working on microorganisms both in vivo and in silico, and I'm constantly amazed by the huge environmental diversity of microbes. Outside the lab, I'm an avid reader with a passion for modern poetry, art, and theater. I'm also a proud sci-fi geek, a wife, and a mother to two teenagers and two dogs who keep life interesting.
